\* Now with up to 50" finished opening height.

\*\* The Isokern components are a natural material & slight variations in dimensions may occur. See firebox dimensions for actual opening sizes.

...over 15 million meters of the Isokern DM Chimney system installed.

- flue sizes range from 6" to 14"
- first component based chimney system
- maximum security against escaping smoke and Carbon Dioxide Gasses
- tongue and groove construction
- outer case and inner liner allow high insulation
- zero clearance to combustible framing
- supersedes the standard testing for UL 103HT requirements
- made with Icelandic pumice
- withstands chimney fires
